# TASK 24-30-00-810-810 #1 DC GEN HOT (Caution) - Fault Isolation

#### 1. General

- A. This fault isolation procedure is for when the #1 DC GEN HOT caution light on the Caution and Warning Panel (CAWP) is on.
- B. The #1 DC GEN HOT caution light on the CAWP comes on when the #1 DC generator temperature is more than 166°C (330.8°F).
- C. There are no related Central Diagnostic System (CDS) or Electrical Power Control Unit (EPCU) fault review status messages.
- D. Refer to Fault Tree for the overview of the task.Refer to Figure 210

### 2. Job Set-Up Information

Subtask 24-30-00-946-012

### A. Reference Information

REFERENCE	DESIGNATION
AMM20-30-11-760-801	Electrical Test of the Aircraft Wiring
AMM24-00-00-861-801	Energize the Electrical System
AMM24-00-00-861-802	De-energize the Electrical System
AMM24-00-00-910-801	Electrical/Electronic Safety Precautions
AMM24-31-00-710-802	Operational Test of the Main 28V DC Generation System
AMM24-31-01-000-801	Removal of the DC Starter/Generator
AMM24-31-01-400-801	Installation of the DC Starter/Generator
AMM31-51-01-000-801	Removal of the Caution and Warning Panel
AMM31-51-01-400-801	Installation of the Caution and Warning Panel
WM24-31-00	DC Power Generation System

### 3. Job Set-Up

Subtask 24-30-00-910-015

WARNING: OBEY ALL THE SAFETY PRECAUTIONS WHEN YOU DO MAINTENANCE ON OR

NEAR ELECTRICAL/ELECTRONIC EQUIPMENT. IF YOU DO NOT DO THIS, YOU CAN CAUSE INJURIES TO PERSONS AND DAMAGE TO THE EQUIPMENT.

A. Obey all the electrical/electronic safety precautions (Refer to AMM24–00–00–910–801).

PSM 1-84-23 EFFECTIVITY:

See First Effectivity on Page 244 of 24–30–00

Print Date: 2025-04-22

Subtask 24-30-00-810-059

B. Before you carry out the Fault Isolation procedure inspect all the related connectors for the recessed pins, signs of pitting or arching, corrosion, discoloration (heat damage), fluid contamination or presence of foreign material and physical damage. If damage is found, repair the damage.

### 4. Fault Confirmation

Subtask 24-30-00-810-014

- A. Do the fault confirmation as follows:
  - (1) Energize the aircraft electrical system (Refer to AMM24–00–00–861–801).
  - (2) If the #1 DC GEN HOT light comes on, refer to Subtask 24–30–00–810–015 for the Fault Isolation.
  - (3) If the #1 DC GEN HOT light does not come on, refer to Subtask 24–30–00–810–060 for the Fault Isolation.

### 5. Fault Isolation

Subtask 24-30-00-810-015

NOTE: When you do a check for the ground faults, you must do the check with the airframe ground and the connector backshell shield ground points.

- A. Remove the electrical connector 2421–P1 from the #1 DC generator.
- B. If the #1 DC GEN HOT light goes off, remove and replace the #1 DC generator (Refer to AMM24–31–01–000–801 and AMM24–31–01–400–801). Do the Close Out.
- C. If the #1 DC GEN HOT light does not go off, remove the electrical connector 3312–P3 from the CAWP.
- D. Check the wiring for the ground faults and isolation resistance between the #1 DC generator and the CAWP (Refer to WM24–31–00 and AMM20–30–11–760–801):

2421-P1	3312-P3
(#1 DC Generator)	(CAWP)
G	27

- E. If the wiring is unserviceable, repair the wiring.
- F. Install the electrical connectors 2421–P1 to the #1 DC generator and 3312–P3 to the CAWP.
- G. If the #1 DC GEN HOT light still comes on, remove and replace the CAWP (Refer to AMM31–51–01–000–801 and AMM31–51–01–400–801). Do the Close Out.

PSM 1–84–23 EFFECTIVITY: See First Effectivity on Page 244 of 24–30–00

Page 245

#### Subtask 24-30-00-810-060

- H. If the #1 DC GEN HOT light does not come on when the aircraft electrical system is energized, do an operational test of the Main 28V DC generation system (Refer to AMM24–31–00–710–802).
- I. If the #1 DC GEN HOT light does not come on, do the Close Out.
- J. If the #1 DC GEN HOT light comes on, remove and replace the #1 DC generator (Refer to AMM24–31–01–000–801 and AMM24–31–01–400–801). Do the Close Out.

### 6. Close Out

Subtask 24-30-00-941-012

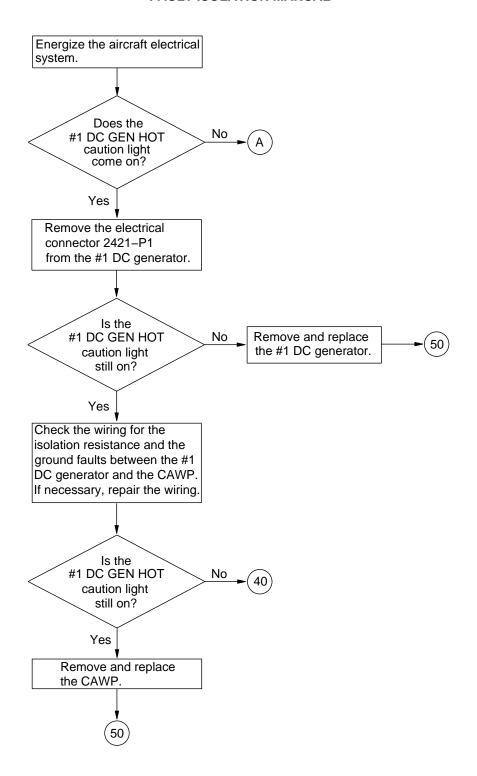

- A. Do an operational test of the Main 28V DC generation system (Refer to AMM24–31–00–710–802).
- B. Make sure that the #1 DC GEN HOT light on the CAWP is not on.
- C. De-energize the aircraft electrical system (Refer to AMM24-00-00-861-802).
- D. Remove all the tools, equipment and unwanted materials from the work area.
